

Why Enroll Your Child in Music Lessons?

By Dan Lefler

- 1. The Mozart Effect**
Music stimulates the math and language parts of the brain.
- 2. Sequential Order Thinking**
Music teaches a start, a middle, and an end to each challenging problem.
- 3. Public Speaking & Performance Skills**
Music opens up doors for performance and public speaking and makes it fun too.
- 4. Memorization Skills**
Music teaches life long memory skills both personally and in business.
- 5. Overall Superior Learning Skills**
Music teaches to recall things accurately, in a sequential order, and under pressure.
- 6. Confidence, Lots Of Confidence**
Music creates confidence from within with each piece of music your child learns.
- 7. Parent-Child Bonding Years**
Music creates bonding for both by sharing practice, performances, and songs.
- 8. Higher Test Scores = Better College, Better Job**
Music creates higher test scores in other subjects and higher SAT scores for college.
- 9. Higher Probability of Higher Income In the Future**
Music creates superior learning skills, which equates to more income statistically later.
- 10. Part Time Job for the Future**
Music lessons can be taught by high school age kids to younger students after 4 – 5 years of taking lessons themselves. This is a great part time job for teenagers and college students.
